

Muhammad Mohsin

Gujrat, Pakistan • 92 348-1422055 • m.mohsin2055@gmail.com

Full Stack Developer & Designer with over 3+ years of experience in bringing ideas into life using a mix of code and design. I create apps and websites that are not only functional but also easy on the eye, with technologies such as Flutter to WordPress, Next.js, JavaScript, and Ruby on Rails. Having a background in graphic design, this major will mesh very cohesively with development skills I hold and bridge that gap between front-end and back-end development. I like solving complex problems and thriving in settings where I can do my work with people; at the same time, I'm highly motivated to do it by myself. I'm always learning and growing, like finding inventive ways to make projects succeed.

Experience

JAN 2024 – PRESENT

Flutter App Developer (iOS & Android) | Twinspider Technologies | Gujrat, Pakistan

- **Project: Bento Delivaz - Food Delivery App**
 - **Role:** Lead developer for a comprehensive food delivery solution consisting of three distinct apps for buyers, riders, and vendors on both Android and IOS.
 - **Technologies Used:** Flutter, Ruby on Rails (Backend), Google Maps API.
 - **Key Features:**
 - Implemented real-time location tracking for riders, integrated with Google Maps.
 - Developed functionality for seamless food and parcel order placement, including notifications for order placement, cancellation, and completion.
 - Built robust profile management features for users across all three apps.
 - **Admin Panel:** Created a web-based admin panel for managing user accounts, order records, payment processing, and more, enabling efficient oversight and control of the entire delivery system.
- **Project: Flour Management System - ERP Solution**
 - **Role:** Managed the development of Mobile App of a web-based ERP system designed to streamline flour mill operations.
 - **Technologies Used:** Flutter and Dart for frontend and Rubay on Rails for backend.
 - **Key Features:**
 - Designed and implemented modules for managing employee accounts, stock levels, sales, purchases, and reporting.
 - Developed accompanying mobile apps for iOS and Android, providing owners with on-the-go access to essential records and management tools.
 - **Ongoing Responsibilities:**
 - Continuously enhance app features, resolve bugs, and implement updates to meet evolving business needs.
- **Project: Tailer Book - Tailor Shop Management App**
 - **Role:** Led the development of a tailor shop management app with dynamic forms for sizing, customer management, and order processing. The app supports both Android and iOS platforms and offers role-based access for shop owners and employees.
 - **Technologies Used:** Flutter, Firebase.
 - **Key Achievements:**
 - **Dynamic Forms:** Enabled shop owners to create custom sizing forms for items like shirts and pants, updating customer profiles through orders.
 - **Order & Customer Management:** Developed features for placing orders, selecting customers, and syncing measurements automatically with profiles.

- **Employee Management:** Built functionality for owners to add employees with shop access, excluding employee management.
- **Role-Based Access:** Implemented Google Sign-In with separate dashboards for shop owners and employees.
- **Project:** Office Ringer - Office Task & Notification App
 - **Description:**
 - Office Ringer, available on both the Play Store and App Store, replaces the traditional office bell system for calling office staff. It's a role-based app with three roles: Admin, Button, and Ringer.
 - **Key Features:**
 - **Admin:** Manages Buttons and Ringers, assigning multiple Ringers to Buttons.
 - **Button:** Sends notifications to Ringers and schedules tasks, which are displayed on the Ringer's dashboard with time and Button details.
 - **Ringer:** Receives notifications and tasks. Can toggle online/offline status to manage availability. While offline, Ringers won't get notifications but can still view their tasks.
